

Instructions Atteviks Truck wash

Drop in - no appointment required!

1. Swipe the card in the reader at the entry gate or control panel.
2. Make your choice normal wash, quick wash on the screen outside the laundry hall where you swipe the card.
 - For quick wash, choose with or without trailer, with or without tailgate lift and finally (both options) choose with or without underflushing.
3. When underflushing, drive forward slowly until the underflush starts to flush, after 3 seconds the pressure increases and then drive forward slowly until the green light turns red.
4. Go to the control panel in the control room and follow the instructions. Code, regnr and safety info.
5. Make your selections on the control panel.
 - You can make several choices at the same time on the machine, e.g. frame rinsing, side brushes, roof brush, high-pressure bow. These choices vary depending on which add-ons your car has and which add-ons your car wash card has.
 - You can also make different choices if you want to manually add chemicals, such as high pressure, tar solvent, pre-wash (foam lance), wax shampoo (foam lance).

Suggestion! Pre-wash (foam) then brush the cab by hand for a thorough wash, then the machine with frame wash side brushes, roof brush and high pressure bow. For additional fine washing, apply wax shampoo, brush and rinse.

6. When you are done. Rinse clean in the laundry hall, on the walls and sides down towards the central grate. Press "end wash". **The machine will pass the cab, make sure no doors are open on the vehicle.** The control panel will ask you if you want your own receipt.
7. The gate will open automatically. Jump into the car and drive out. The gate closes automatically after you drive out.

- **You are responsible for the vehicle and the equipment in the Truck wash while you are using it.**
- **Double check that nothing can be hit or caught in the machine before activating it.**
- **In case something is broken/doesn't work? Inform staff. We understand that "it was like that when I arrived", we just want to fix the problem as soon as possible.**
